

Biologisches Kolloquium Sommersemester 2012
17:30 Uhr, Criegée-Hörsaal, Fritz-Haber-Weg 2-6

Datum	Sprecher	Thema	Ansprechpartner
16.4.	Prof. Dr. Klaus Peter Hoffmann (Charite, Berlin)	Opsin: a G protein-coupled receptor on different levels of biological organization	Prof. Lamparter
14.5.	Prof. Michael Bölker (University of Marburg)	Peroxisomes' new friends: unexpected dual targeting of glycolytic enzymes in fungi	Prof. Kämper
21.5.	Prof. Dr. Holger Deising (University of Halle)	To be announced	Prof. Kämper
4.6.	Prof. Dr. Jörg Göttlicher (University of	X-ray analytical techniques with synchrotron radiation and their potential for biological applications	Prof. Gescher
11.6.	Prof. Dr. Rainer Meckenstock (University of Munich)	To be announced	Prof. Gescher
18.6.	PD. Dr. Stephan Seiler (University of Göttingen)	Shaping the mold – regulation and function of the COT1 NDR kinase in fungal cell polarity	Prof. Fischer
25.6.	PD Dr. Gunter Doehlemann (Max-Planck-Institute for terrestrial Microbiology, Marburg)	Suppression of host immunity by <i>Ustilago maydis</i>	Prof. Kämper
2.7.	Prof. Dr. Uwe Conrath (RWTH Aachen)	Plant defense priming	Prof. Requena
9.7.	Prof. Dr. Peter Schönheit (University of Kiel)	Glycolysis in hyperthermophiles: Pathways, enzymes and evolution	Prof. Fischer

gez. R. Fischer (608-4630)
