

# Biologisches Kolloquium Winter 2015/16

Datum	Sprecher	Thema	Kontakt
12.10.	<b>Dr. Meritxell Riquelme</b> (CICESE, Ensenada, Mexico)	Polarization of the cell wall synthesis machinery in the fast growing fungus <i>Neurospora crassa</i>	Prof. Fischer
19.10.	<b>Doktorandenseminar</b>	Starts already at 16:30, room 007, Building 30.44	Prof. Orian-Rousseau
26.10.	<b>Prof. Dr. Anne Britt</b> (UC Davis, CA, USA)	Programmed developmental responses to ionizing radiation in <i>Arabidopsis thaliana</i>	Prof. Puchta
2.11.	<b>Dr. Clemens Franz</b> (KIT, Antrittsvorlesung)	Untersuchungen von Zell-Matrix Interaktionen mithilfe der Rasterkraftmikroskopie	Prof. Bastmeyer
16.11.	<b>Doktorandenseminar</b>	See extra invitation.	Prof. Orian-Rousseau
23.11.	<b>Prof. Dr. Ralf Kaldenhoff</b> (University of Darmstadt)	Aquaporins – water- or CO <sub>2</sub> -membrane pores?	Prof. Nick
30.11.	<b>Prof. Dr. Ferdinand le Noble</b> (KIT, Antrittsvorlesung)	Regulation of vascular branching morphogenesis in health and disease	Prof. Fischer
7.12.	<b>Dr. Gary Davidson</b> (KIT, Vorstellungsvortrag)	Cell-cell communication by the Wnt signaling pathway	Prof. Fischer
14.12.	<b>Doktorandenseminar</b>	See extra invitation	Prof. Orian-Rousseau
11.1.	<b>Prof. Dr. Bettina Tudzynski</b> (University of Münster)	Secondary metabolism in <i>Fusarium fujikuroi</i> : genome mining and hierarchical regulatory networks	Prof. Kämper
18.1.	<b>Prof. Dr. Christophe d'Enfert</b> (Pasteur Institute, Paris)	Morphogenesis in the fungal pathogen <i>Candida albicans</i> : a complex interplay between transcription factors	Prof. Fischer
25.1.	<b>Prof. Dr. Wolfgang Marwan</b> (University of Magdeburg)	Sensory control of cell differentiation in <i>Physarum polycephalum</i>	Prof. Lamparter
1.2.	<b>Prof. Dr. Helge Küster</b> (University of Hannover)	Through the doors of perception to function in arbuscular mycorrhizal symbioses	Prof. Requena
8.2.	<b>Doktorandenseminar</b>	See extra invitation	Prof. Orian-Rousseau

17:30 Uhr, Criegee-Hörsaal, Fritz-Haber-Weg 2-6
